Children's Discovery Museum of the Desert ***Exhibit Learning Values*** ***Educational Field Trip Learning Opportunities***

The Children's Discovery Museum of the Desert offers **relevant exhibit space with hands-on activities**. The CDMOD has aligned exhibit learning values with many of the **California State Academic Standards** offering a wealth of learning opportunities to teachers and school children. We hope you find the resources valuable both in your classroom and on museum visits.

Self-guided museum visits through our **Field Trip** program can address several state standards. Gallery Exhibits worksheets are offered for grades K-4. All CDMOD exhibits are listed in alphabetical order with a brief description. After each description is a listing of potential standard matches for your curriculum needs.

In addition, CDMOD has **several worksheets available specifically for the second grade emphasizing math enhancement skills**. A sample of these work sheets is available for reproduction in the classroom and serves as an excellent pre- or post- Museum experience.

The CDMOD program department staff is available for additional questions, consultation and reservation to aid in making the optimal classroom experience for your students.
